

Guide to helping you and your child make the right choices at 14, 16 and 18

When it comes to careers education, information, advice and guidance, we need to ensure that, as parents and carers, we encourage our young people to access relevant and impartial information so that they make informed choices with our guidance, but it is an ever-changing landscape.

At the end of Key Stage 3 (Years 7, 8 and 9) your child will be asked to choose their Pathway (the subjects in which they will take terminal exams at 16). There are things you need to consider and questions you need to ask as a parent/carer to help your child make the most appropriate choices:

- Which subjects are compulsory in your child's school?
- Should your child be doing double or triple science?
- Which subjects is your child thriving in?
- Which subjects does your child enjoy?
- Which subjects are a source of anxiety and stress for your child?
- Which subject areas consistently yield strong outcomes in your child's school?
- How many subjects is your child able to choose?
- Does your child's school offer GCSEs, iGCSEs, BTECs, OCR Cambridge Nationals or any other alternative?
- What is your child's preferred learning style – practical subjects or theoretical?
- Does your child have a career in mind already so that they can choose subjects based on their dream job?
- Does your child know what A levels they will take aged 18 in order to guide their GCSE choice at 14?
- Is your child only choosing subjects to be with a favourite teacher or to stay with friends?
- Is your child's school offering an Pathways Evening to enable you to seek guidance from teachers?
- Is there someone you know doing the job to which your child is aspiring to seek advice from?
- Have you and your child fully researched the various options (recommended websites below)?

16

At the end of Key Stage 4 (years 10 and 11), your child will be asked to choose their next stage in compulsory education – key stage 5. There are things you need to consider and questions you need to ask as a parent/carer to help your child make the most appropriate choices.

- What sixth form or colleges would your child consider attending. Consider and compare.
- Are there any other sixth form schools or colleges that your child can consider, visit and compare?
- When are their open evenings?
- Should your child be doing A levels, Applied General Qualifications, an Apprenticeship, volunteering, or looking for work?
- Before GCSE results day, ask which subjects is your child thriving in?
- On GCSE results day, what subjects did your child perform well in?
- Which subjects did your child enjoy during Key Stage 4?
- Which subjects were a source of anxiety and stress for your child during Key Stage 4?
- How many subjects is your child able to choose?
- Has your child considered the amount of homework particular subjects yield to help them choose how many and which subjects to choose?
- What is your child's preferred learning style – practical subjects or theoretical?
- Does your child have a career in mind already so that they can choose subjects based on their dream job?
- Does your child want to go to University, into an Apprenticeships or enter the world of work after Key Stage 5?
- Is your child only choosing subjects to be with a favourite teacher or to stay with friends?
- Is your child's school offering a Pathways Evening to enable you to seek guidance from teachers?

- Is there someone you know doing the job to which your child is aspiring to seek advice from?
- Has your child spoken to young people currently in apprenticeships, on A level courses, or on BTEC course to get feedback on the reality of each experience?
- If considering a university, has your child contacted them to see if they have pre-requisites in terms of A level or BTEC choices?
- Have you and your child fully researched the various options (recommended websites below)?

At the end of Key Stage 5 (Should your child progress to years 12 and 13 at a local 6th Form or college), your child will need to decide what their next step in life is. There are things you need to consider and questions you need to ask as a parent/carer to help your child make the most appropriate choices.

- Should your child be going to University, undertaking an Apprenticeship, volunteering, looking for paid work or taking a gap year?
- Are there any agencies in your region that can advise and help you apply for apprenticeships?
- Are they holding any open days (that may be advertised in the local newspaper)?
- Are there any companies that you can contact directly to see if they offer apprenticeships?
- Is your child better to attend University and exit with loans to repay, or better to learn and earn at the same time on an apprenticeship?
- Do you know someone in your child's desired profession that you can seek advice and guidance from?
- If you and your child are worried about the financial burden of university, can you seek advice from the student loan company or UCAS?
- If choosing university, has your child considered the employability rate of the course they are considering?
- Have you attended lots of University open days in order to compare and contrast provision?
- Have you and your child had the opportunity to talk to apprentices and/or university students to get realistic feedback about their courses/studies?
- Have you and your child fully researched the various options (recommended websites below)?
